

Abbr.	Drug Name	Trade Names	Street Names	Detection Time	Detected In	Form	Effects	Description	Typical Detection Cutoff U=Urine S=Saliva	Legal Status (USA)
ALC	Alcohol (Ethanol)	Beer, Liquor	Booze, Brew	Volume Dependent, typically less than 12 hours	Both	liquid	loss of coordination, short term memory loss, senses inhibited	Typically a liquid consumed that causes intoxication	variable, legal limit for driving typically .08%, lower some states	legal if over 21
AMP	Amphetamines	Obetrol, Dexedrine	Speed, Amp, Bennie, Chalk	4 days	Both	pills, powder	euphoria, alertness, reduced appetite, increased energy	Stimulant and appetite suppressant	1,000ng/mL-U 50ng/mL-S	controlled
BZO	Benzodiazepines	Alprazolam (Xanax), Flunitrazepam (Rohypnol), etc	Downs, Tranks	7 days	Both	pills	sedation	induce sleep, relieve anxiety	300ng/mL-U 10ng/mL-S	controlled
BAR	Barbiturates	Amytal (Amobarbital), Phenobarbital (Luminal), etc.	Barbs, Red, Downers, Yellow Jackets, Red Devils	7 days	Both	pills, powder	sedation, hypnosis, anesthetics, anticonvulsants	Nervous system depressant	300ng/mL-U 50ng/mL-S	controlled
BUP	Buprenorphine	Suboxone	Bupe, Subs, Stops	4 days	Both	pills, powder	similar to opiates but less addictive	Provides pain relief and used to help treat opiate addiction	10ng/mL-U 5ng/mL-S	controlled
COC	Cocaine	Cocaine	Coke, Blow, Snow, Toot, Rock	4 days	Both	powder, rocks	increased energy, paranoia, aggression	nervous system stimulant and local anesthetic	300ng/mL-U 20ng/mL-S	controlled
MDMA	Ecstasy	MDMA	Ecstasy, X, E, Love Drug, Rolls	3 days	Urine	pills	increased heart rate, increased blood pressure, euphoria, hallucinations	common "club drug"	500ng/mL-U	illegal

Abbr.	Drug Name	Trade Names	Street Names	Detection Time	Detected In	Form	Effects	Description	Typical Detection Cutoff U=Urine S=Saliva	Legal Status (USA)
MET	Methamphetamines	Desoxyn	Crank, Ice, Glass, Crystal	5 days	Both	pills, powder, crystal	euphoria, alertness, reduced appetite, increased energy, anxiety, paranoia, hallucinations	similar to amphetamines, but with greater effects on nervous system	1,000ng/mL-U 50ng/mL-S	controlled
MTD	Methodone	Dolophine, Methodone	Meth, Dollies	5 days	Both	pill, powder, liquid	euphoria, drowsiness	narcotic pain reliever and substitute for opiates in rehabilitation	300ng/mL-U 30ng/mL-S	controlled
OPI MOP	Opiates	Codeine, Morphine, Hydrocodone, Oxycodone	H, Smack, Junk, Percs	4 days	Both	pills, powder	euphoria, drowsiness	Nervous system depressant, derived from opium poppy	300ng/mL-U 2,000ng/mL-U 40ng/mL-S	controlled
PCP	Phencyclidine	Phencyclidine	Angel Dust, Hog	14 days	Both	pills, powder	mood swings, hallucinations	initially a surgical anesthetic, replaced with safer alternatives	25ng/mL-U 10ng/mL-S	controlled
TCA	Tricyclic Anti-depressants	Elavil, Aventyl, Tofranil, etc	N/A	10 days	Urine	pills, powder	antidepressant	used to treat depression	1,000ng/mL-U	controlled
THC	Marijuana	THC, Cannabis	Pot, Weed, Reefer, Grass, Mary Jane	30 days	Both	dried flowers	euphoria, paranoia, increased appetite, short-term memory loss, lack of coordination	hallucinogen providing euphoria	50ng/mL-U 12ng/mL-S 50ng/mL-S	Legal in some states (Nov. 2012)
PPX	Propoxyphene	Darvocet, Darvon	Pinks, Footballs	2 days	Both	pills, powder	pain reduction, sedation	analgesic, local anesthetic, intended to treat mild to moderate pain	300ng/mL-U 50ng/mL-S	controlled

Abbr.	Drug Name	Trade Names	Street Names	Detection Time	Detected In	Form	Effects	Description	Typical Detection Cutoff U=Urine S=Saliva	Legal Status (USA)
OXY	Oxycodone	OxyContin, Roxies, Oxyfast	Roxies, Blues	4 days	Both	pills, powder	euphoria	used to treat severe pain	100ng/mL-U 20ng/mL-S	controlled
COT	Cotinine	Cotinine, Nicotine	Smoke, Cigs, Chew, Dip	4 days	Both	cigarettes, cigars, chewing tobacco, etc	stimulant, relaxant, can decrease appetite	dopamine release creates pleasurable sensation	200ng/mL-U 20ng/mL-S	Legal if over 18 or 19, based on state
EDDP	EDDP	EDDP (metabolite of methadone)	N/A	3 days	Both	pills, powder, liquid	N/A	metabolite of MTD. testing for EDDP eliminates interference from donor's metabolism	100ng/mL-U 20ng/mL-S	controlled (see MTD)
FYL	Fentanyl	Actiq, Duragesic, Sublimaze	Apache, China girl, China white, dance fever, etc	3 days	Urine	injection, transdermal patch, powder, lozenge	euphoria, nausea, drowsiness, confusion, sedation	treat severe pain, sometimes used for opiate tolerant individuals	10ng/mL-U	controlled
K2/SPICE	Synthetic Marijuana	K2, Spice, Incense	Bliss, Black Mamba, Bombay Blue, Cloud Nine, Fake Weed, Genie, Spice	3 days	Urine	joint, pipe, sometimes tea	paranoia, euphoria, giddiness	synthetic cannabis with effects similar to marijuana	25ng/mL-U	Legal in some states (Nov. 2012)
KET	Ketamine	Ketanest, Ketaset, Ketalar	Special K, Jet, Super Acid, K, Cat Valium	3 days	Both	liquid, powder	delirium, amnesia, depression, and long-term memory and cognitive difficulties	tranquilizer typically used in veterinary practice, abused as club drug and date rape drug	1,000ng/mL-U 50ng/mL-S	controlled
TML	Tramadol	Conzip, Ryzolt, Ultracet, Ultram	N/A	3 days	Urine	tablet	pain reduction	treat moderate to severe pain, or long lasting pain	100ng/mL-U	controlled
